“Breakfast is everything. The beginning, the first thing.
It is the mouthful that is the commitment
to a new day, a continuing life.”

A. A. GILL

THE HISTORY OF POLENKÖY

The history of the village Polenköy begins 40 years ago in the Turkish province Denizli, in Çivril, which also is referred to as the “Green” Çivril. The landscape represents waterfalls in the hillsides, the oaks in the hills, vineyards, and a rich flora.

Everything started with a queen bee and a handful of worker bees leaving their hive to found their own kingdom on a walnut tree in a backyard of a house.

In the course of time the handful of bees turned into hundreds of thousands of bees. In a couple of decades one beehive turned into tens of thousands of beehives. The bees flew from land to land and landed on flowers on plateaus, plains, foothills. Flying from flower to flower and carrying the pollens on their legs, the bees delivered the healthy honey we eat today. However, they didn't stop guiding us to produce more natural products; molasses made out of grapes from the vineyards and tahini made out of sesame from the fields. On some days the bees landed on strawberries and blackberries, on some days they landed on cherries, figs, apricots and quinces which lead to different kinds of delicious jams. The busy bees never got tired, they landed on olive trees and gave us pickled olives and the golden oil that we use in our dishes. Who knows which plants they land on in the future and which savors they will bring to our tables. One thing is for sure: They brought happiness and health to thousands of households.

Thousands of plants were pollinated. The pollens became products. These products became very delicious delights in their most natural way.

Bon appetit!

EXPORT STRUCTURE

HVS GROUP is a Turkey located food company that offers his clients quality, good taste and naturalness with discipline and diligence corresponding to international standards throughout the whole production process. HVS GROUP produces food products for export from Turkey with different brands for every customer's needs. In addition, HVS GROUP offers customers who want to import products into their countries under their own brands a comprehensive one-stop-range of services from design to quality assurance,

from packaging to transport. The mission of HVS GROUP is to offer innovative products under its own brand to the consumers in Turkey and especially in international markets and to ensure a profitable and sustainable growth. All the products in our portfolio are under our control at every stage of production until the final filling and packaging. Therefore, all certificates and analytical procedures of our products comply with international standards. In this way we can offer our customers the desired quality, natural origin, and taste. Among the products we export are honey, molasses, jam and olive oil. Our range of products is constantly expanding.

Many of the branded products in the HVS GROUP portfolio are exported with customers to end users all over the world.

Please contact us for any kind of information and inquiries regarding our export activities. Please send us an e-mail to export@hvsgroup.com.tr or click on "Contact Us" and fill out the contact form.

ACACIA HONEY

LINDEN TREE HONEY

THYME HONEY

CHESTNUT HONEY

POLLEN

The bees, flying from flower to flower, carry the pollens on their legs and bring the healthy honey to our kitchens.

THE DELIGHT OF THE MOUNTAINS, PLAINS AND PLATEAUS!

Multi Flower Honey 850 gr.
Product Code : 111073

Multi Flower Honey 460 gr.
Product Code : 111072

MULTI-FLOWER HONEY

Our bees flying from land to land have produced the best honey for you by feeding on the flowers they visit in the rich plateaus and plains at an altitude of about 500 meters.

Our carefully selected honey is a delightful option for your meals which you can enjoy safely.

Product Name	Unit in grams	Units per Tray or DB (x)	# of Trays per Masterbox	Units Per Masterbox or DB	Masterbox or DB per Pallet	Units Per Pallet	Net Weight per Pallet (Kg)	Gross Weight per Pallet (Kg)

Pine Honey 460 gr.
Product Code : 111074

PINE HONEY

Since the beginning of our apiculture story our bees have been carrying the sugary secretions left by the insect *Marchalina hellenica*, inhabitant of the unique pine forests of the Aegean Region in Turkey, to their hive for decades with the aim of producing our exquisite pine honey. It is our pleasure having you to bring our Pine Honey to your table, which has a distinctive pine scent of the Aegea and an appetizing flavor thanks to the labor of our precious bees.

Product Name	Unit in grams	Units per Tray or DB (x)	# of Trays per Masterbox	Units Per Masterbox or DB	Masterbox or DB per Pallet	Units Per Pallet	Net Weight per Pallet (Kg)	Gross Weight per Pallet (Kg)

Lavender Honey 850 gr.
Product Code : 111077

Lavender Honey 460 gr.
Product Code : 111076

LAVENDER HONEY

Lavender especially grows in the Mediterranean region of Turkey in May and June. Therefore, our bees visit the flowers of lavender plants in that limited period of time to produce honey. It is known that Lavender Honey has multiple beneficial effects on human health along with being an aromatic monofloral extract. We carefully collect this delicate honey to bring it safely to your table.

Product Name	Unit in grams	Units per Tray or DB (x)	# of Trays per Masterbox	Units Per Masterbox or DB	Masterbox or DB per Pallet	Units Per Pallet	Net Weight per Pallet (Kg)	Gross Weight per Pallet (Kg)

Linden Tree Honey 850 gr.
Product Code : 111081

Linden Tree Honey 460 gr.
Product Code : 111080

LINDEN TREE HONEY

To be able to offer you Linden Tree Honey, which has a particular flavor, our bees visit linden trees which blossom in the months of June and July. They collect the nectar of the linden tree flower to use it in the process of producing honey in their hive. We are sure that you are always going to want to have the amber-colored and quite appetizing Linden Tree Honey on your table.

Product Name	Unit in grams	Units per Tray or DB (x)	# of Trays per Masterbox	Units Per Masterbox or DB	Masterbox or DB per Pallet	Units Per Pallet	Net Weight per Pallet (Kg)	Gross Weight per Pallet (Kg)

Thyme Honey 850 gr.
Product Code : 111083

Thyme Honey 460 gr.
Product Code : 111082

THYME HONEY

Our bees visit thyme flowers to process the nectar they get from the flowers and bring us together with thyme honey, which has a unique taste, an intense aroma and an overwhelming scent. You will want to make thyme honey available on your table all year round even though it is only produced between May and August.

Chestnut Honey 850 gr.
Product Code : 111085

Chestnut Honey 460 gr.
Product Code : 111084

CHESTNUT HONEY

Chestnut honey, for which our bees process the extracts of the chestnut tree flower to produce this kind of honey in the Black Sea Region, is known as a natural antiseptic besides being rich in minerals. It is a little bit more bitter than the multi-flower honey. We carefully gather this product, which is rich in trace elements such as potassium, magnesium, manganese and barium, making sure you are always going to want to have it on your table.

Pollen 100 gr.
Product Code : 111086

POLLEN

As it can be inferred from our brand, we are the center of pollen.

Pollen, which is an important source in the nutrition patterns of bees, is a valuable nutrient due to its fats, carbohydrates, fibers, minerals, amino acids and vitamins.

Bee pollen, which is quite a rich source of enzymes, ensures a healthy digestive system.

The antibiotic property of bee pollen allows the immune system to be purified from germs and strengthen itself.

It is a good source of antioxidants. With its antioxidant properties, it helps the body to be renewed and keeps it young.

GRAPE MOLASSES

MULBERRY MOLASSES

JUNIPER MOLASSES

TAHINI

HALVA

Our molasses is made of the fresh fruits of the respective season produced with great care in a traditional way and packed for you.

MOLASSES MADE OF SEASONAL FRESH FRUITS!

Carob Molasses 800 gr.
Product Code : 111052

Carob Molasses 380 gr.
Product Code : 111051

CAROB MOLASSES

Locust, also known as carob, is a molasses produced by concentrating the sweetened fruit juice obtained by soaking in water.

As it can be understood from the name of the series, the minerals the molasses contain make a great contribution to our daily healthy and energetic lives. Since molasses are valuable contributors of which the nutrients quickly enter the blood, they swiftly meet our energy needs.

They are produced only from fruits which are suitable to be used in the preparation of molasses. They do not contain added sugar, glucose, or additives. Thanks to the production under vacuum at low temperatures, the mineral and vitamin values remain high.

*Not recommended for diabetics.

FORM SERIES

Our Form series jams are produced with the extract of the stevia plant. Stevia is a plant that grows in South America and is used as a natural and additive-free substitute instead of aspartame and similar artificial sweeteners. Another feature of the stevia plant we use in our jam is that it balances blood sugar levels. Our Form series jams have a thicker consistency and whole-grained features. They are suitable for diabetics. Unlike other diabetic jams, they do not contain any kinds of artificial sweeteners such as aspartame and acesulfame.

OLIVE GROUP

BLACK SERIES

GREEN SERIES

SPECIAL SERIES

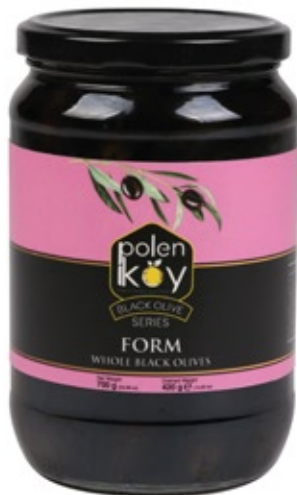

Olives of the highest quality are selected from Turkey's best olive growing regions. Harvested and transported immediately to modern facilities with highest technology, they are processed using state-of-the-art equipment, to reach your table fresh, hygienic and with delicious taste and rich flavor.

The legend says that the olive tree was the first tree ever planted and thus it is assumed to be as old as mankind.

STUFFED, PITTED, SLICED OLIVES AND OLIVE PASTE KINDS!

Natural Black Olives 450 gr.
Product Code : 111210

Form Whole Ripe Olives 420 gr.
Product Code : 111211

BLACK SERIES

Natural Black Olives are left in brine to ripen fully and go through a natural and gentle ripening process. Then they would be treated with oil to make them ready for consumption. Our Form Whole Ripe Olives – the choice of many olive lovers around the world – are produced using Californian style oxidation and the latest processing technology and high-quality sterile packaging.

Product Name	Unit in grams	Package	Calibre	Pcs per Box	Pallet (80x120)	Shelf Life

SOUTH AEGEAN SERIES TIN CAN

Olive trees give olives a specific character depending on the climate, the soil, the wind and the vegetation of the region where the olive trees are located. This is why we classify our products by different characters and identities. So, we offer our consumers products that have their specific identities and characteristics.

NORTH AND SOUTH-AEGEAN EXTRA VIRGIN OLIVE OIL!

Extra Virgin Olive Oil 250 ML

Extra Virgin Olive Oil 500 ML
Product Code : 111122

Extra Virgin Olive Oil 750 ML
Product Code : 111123

NORTH-AEGEAN COLLECTION

Olive trees give olives a specific character depending on the climate, the soil, the wind and the vegetation of the region where the olive trees are located. This is why we classify our products by different characters and identities. So, we offer our consumers products that have their specific identities and characteristics.

Thanks to the various and specific sorts of the regions of Çanakkale, Balıkesir, Ayvalık and the gulf of Edremit, the North Aegean collection is a rather fluid olive oil with a fresh fruit taste, grass scent and a delicious aroma. A mild and fading taste of bitterness and burning in the palate and on the tip of the tongue is characteristic for this oil.

Acidity is 0,8% at most..

SOUTH-AEGEAN COLLECTION

Olive trees give olives a specific character depending on the climate, the soil, the wind and the vegetation of the region where the olive trees are located. This is why we classify our products by different characters and identities. So, we offer our consumers products that have their specific identities and characteristics.

The South Aegean collection consists of olive oils that is produced from the so-called 'Memecik' olives from the regions Izmir, Aydın and Muğla which are darker in color, less fluid and come with a stronger fruit taste.

Acidity is 0,8% at most.
